

We believe that the quality of early childhood development is dependent on the connection between parents and their caregivers.

Brightwheel is a mobile app for use with your smartphone or email. It allows teachers to share with parents the important moments of your child's day such as activities, meals, nap times, photos, and videos. You will also be able to send and receive important messages with your child's teacher through this app.

Simply provide your email address and phone number on the Brightwheel form to enroll .

You will soon receive an invite from Brightwheel to complete the registration. You should also download the app on your smartphone or device.

We look forward to sharing your child's experiences with you by providing a window into their day.

Please fill out the bottom section of this for and return with your enrollment packet.

Warmly, The Early Childhood Team at Pope John Paul II School
